Toxicology 167 (2001) 235–237

TOXICOLOGY

# Subject index of volume 167

**ABC transporter**; Cholestasis; Troglitazone; Bile acids; Hepatotoxicity; Sulfotransferase; Drug-drug interactions **167**, 83

**Aflatoxins**; Mycotoxins; Ruminants; Non-ruminants **167**, 101

**Alkaline single cell gel**; Mercuric chloride; DNA damage; Rat; Electrophoresis; Comet assay **167**, 191

**A549 lung cells**; Fluoride; IL-8; GTP-binding proteins; MAP-kinases **167**, 145

**ANIT**; Arsenite; GSH; MRP2; Cholestasis **167**, 73

**Arsenite**; ANIT; GSH; MRP2; Cholestasis **167**, 73

**ATP-binding cassette transporter**; Multidrug resistance protein; Xenobiotic transport; Xenotoxin elimination; Carcinogen metabolism **167**, 3

**Basal expression**; Multidrug resistance protein 2 (MRP2); Promoter; Regulation **167**, 25

**Bile acids**; Cholestasis; Troglitazone; ABC transporter; Hepatotoxicity; Sulfotransferase; Drug-drug interactions **167**, 83

**Bile salt export pump**; Hepatocytes; Hormone; Multidrug resistance-associated protein 2; P-glycoprotein; Xenobiotic **167**, 37

**Bronchial cells**; Human lung cells; Peripheral cells; MRP1; MDR1; Lrp; Rhodamine 123; Carboxy-dichlorofluorescein CDF **167**, 59

**Cadmium**; Taurine; Toxicity; Hepatotoxicity; Nephrotoxicity **167**, 173

**Carboxy-dichlorofluorescein CDF**; Human lung cells; Bronchial cells; Peripheral cells; MRP1; MDR1; Lrp; Rhodamine 123 **167**, 59

**Carcinogen metabolism**; Multidrug resistance protein; ATP-binding cassette transporter; Xenobiotic transport; Xenotoxin elimination **167**, 3

**Cholestasis**; ANIT; Arsenite; GSH; MRP2 **167**, 73

**Cholestasis**; Troglitazone; Bile acids; ABC transporter; Hepatotoxicity; Sulfotransferase; Drug-drug interactions **167**, 83

**Comet assay**; Mercuric chloride; DNA damage; Rat; Alkaline single cell gel; Electrophoresis **167**, 191

**Contact allergens**; DEA; Dose–response; Guinea pig maximization test; Local lymph node assay; Sensitizing potency; TMTD; ZDMC **167**, 207

**Cyclosporin A**; Rat hepatocyte culture; Rhodamine 123; P-glycoprotein; Verapamil; Triton X-100 **167**, 47

**DEA**; Contact allergens; Dose–response; Guinea pig maximization test; Local lymph node assay; Sensitizing potency; TMTD; ZDMC **167**, 207

**DETC**; Iron overload; Nitric oxide; Spin trapping **167**, 199

**Developmental toxicity**; di-*n*-butyltin; Teratogenicity; Maternal age; Organotin **167**, 181

**di-*n*-butyltin**; Developmental toxicity; Teratogenicity; Maternal age; Organotin **167**, 181

**DNA damage**; Mercuric chloride; Rat; Alkaline single cell gel; Electrophoresis; Comet assay **167**, 191

**Dose–response**; Contact allergens; DEA; Guinea pig maximization test; Local lymph node assay; Sensitizing potency; TMTD; ZDMC **167**, 207

**Drug-drug interactions**; Cholestasis; Troglitazone; Bile acids; ABC transporter; Hepatotoxicity; Sulfotransferase **167**, 83

**Electrophoresis**; Mercuric chloride; DNA damage; Rat; Alkaline single cell gel; Comet assay **167**, 191

**Fluoride**; IL-8; GTP-binding proteins; MAP-kinases; A549 lung cells **167**, 145

PII: S0300-483X(01)00511-X

**Growing rats**: Zinc deficiency; Hematological parameters; Mineral concentrations **167**, 163

**GSH**: ANIT; Arsenite; MRP2; Cholestasis **167**, 73

**GTP-binding proteins**: Fluoride; IL-8; MAP-kinases; A549 lung cells **167**, 145

**Guinea pig maximization test**: Contact allergens; DEA; Dose–response; Local lymph node assay; Sensitizing potency; TMTD; ZDMC **167**, 207

**Hematological parameters**: Zinc deficiency; Growing rats; Mineral concentrations **167**, 163

**Hepatocytes**: Bile salt export pump; Hormone; Multidrug resistance-associated protein 2; P-glycoprotein; Xenobiotic **167**, 37

**Hepatotoxicity**: Cadmium; Taurine; Toxicity; Nephrotoxicity **167**, 173

**Hepatotoxicity**: Cholestasis; Troglitazone; Bile acids; ABC transporter; Sulfotransferase; Drug-drug interactions **167**, 83

**Hormone**: Bile salt export pump; Hepatocytes; Multidrug resistance-associated protein 2; P-glycoprotein; Xenobiotic **167**, 37

***hsp*70**: Ischemia; Oxidative stress; *hsp*110 **167**, 135

***hsp*110**: Ischemia; Oxidative stress; *hsp*70 **167**, 135

**Human lung cells**: Bronchial cells; Peripheral cells; MRP1; MDR1; Lrp; Rhodamine 123; Carboxy-dichlorofluorescein CDF **167**, 59

**IgE**: Protein allergenicity; IgG; Oral exposure; Systemic exposure; Predictive testing **167**, 217

**IgG**: Protein allergenicity; IgE; Oral exposure; Systemic exposure; Predictive testing **167**, 217

**IL-8**: Fluoride; GTP-binding proteins; MAP-kinases; A549 lung cells **167**, 145

**Iron overload**: Nitric oxide; Spin trapping; DETC **167**, 199

**Ischemia**: Oxidative stress; *hsp*110; *hsp*70 **167**, 135

**Local lymph node assay**: Contact allergens; DEA; Dose–response; Guinea pig maximization test; Sensitizing potency; TMTD; ZDMC **167**, 207

**Lrp**: Human lung cells; Bronchial cells; Peripheral cells; MRP1; MDR1; Rhodamine 123; Carboxy-dichlorofluorescein CDF **167**, 59

**MAP-kinases**: Fluoride; IL-8; GTP-binding proteins; A549 lung cells **167**, 145

**Maternal age**: di-*n*-butyltin; Developmental toxicity; Teratogenicity; Organotin **167**, 181

**MDR1**: Human lung cells; Bronchial cells; Peripheral cells; MRP1; Lrp; Rhodamine 123; Carboxy-dichlorofluorescein CDF **167**, 59

**Mercuric chloride**: DNA damage; Rat; Alkaline single cell gel; Electrophoresis; Comet assay **167**, 191

**Mineral concentrations**: Zinc deficiency; Growing rats; Hematological parameters **167**, 163

**MRP2**: ANIT; Arsenite; GSH; Cholestasis **167**, 73

**MRP1**: Human lung cells; Bronchial cells; Peripheral cells; MDR1; Lrp; Rhodamine 123; Carboxy-dichlorofluorescein CDF **167**, 59

**Multidrug resistance-associated protein 2**: Bile salt export pump; Hepatocytes; Hormone; P-glycoprotein; Xenobiotic **167**, 37

**Multidrug resistance protein**: ATP-binding cassette transporter; Xenobiotic transport; Xenotoxin elimination; Carcinogen metabolism **167**, 3

**Multidrug resistance protein 2 (MRP2)**: Promoter; Regulation; Basal expression **167**, 25

**Mycotoxins**: Aflatoxins; Ruminants; Non-ruminants **167**, 101

**Nephrotoxicity**: Cadmium; Taurine; Toxicity; Hepatotoxicity **167**, 173

**Nitric oxide**: Iron overload; Spin trapping; DETC **167**, 199

**Non-ruminants**: Mycotoxins; Aflatoxins; Ruminants **167**, 101

**Oral exposure**: Protein allergenicity; IgE; IgG; Systemic exposure; Predictive testing **167**, 217

**Organotin**: di-*n*-butyltin; Developmental toxicity; Teratogenicity; Maternal age **167**, 181

**Oxidative stress**: Ischemia; *hsp*110; *hsp*70 **167**, 135

**Peripheral cells**: Human lung cells; Bronchial cells; MRP1; MDR1; Lrp; Rhodamine 123; Carboxy-dichlorofluorescein CDF **167**, 59

**P-glycoprotein**: Bile salt export pump; Hepatocytes; Hormone; Multidrug resistance-associated protein 2; Xenobiotic **167**, 37

**P-glycoprotein**: Rat hepatocyte culture; Rhodamine 123; Verapamil; Cyclosporin A; Triton X-100 **167**, 47

**Predictive testing**: Protein allergenicity; IgE; IgG; Oral exposure; Systemic exposure **167**, 217

**Promoter**: Multidrug resistance protein 2 (MRP2); Regulation; Basal expression **167**, 25

**Protein allergenicity**: IgE; IgG; Oral exposure; Systemic exposure; Predictive testing **167**, 217

**Rat hepatocyte culture**: Rhodamine 123; P-glycoprotein; Verapamil; Cyclosporin A; Triton X-100 **167**, 47

**Rat**: Mercuric chloride; DNA damage; Alkaline single cell gel; Electrophoresis; Comet assay **167**, 191

**Regulation**: Multidrug resistance protein 2 (MRP2); Promoter; Basal expression **167**, 25

**Rhodamine 123**: Human lung cells; Bronchial cells; Peripheral cells; MRP1; MDR1; Lrp; Carboxy-dichlorofluorescein CDF **167**, 59

**Rhodamine 123**; Rat hepatocyte culture; P-glycoprotein; Verapamil; Cyclosporin A; Triton X-100 **167**, 47

**Ruminants**; Mycotoxins; Aflatoxins; Non-ruminants **167**, 101

**Sensitizing potency**; Contact allergens; DEA; Dose–response; Guinea pig maximization test; Local lymph node assay; TMTD; ZDMC **167**, 207

**Spin trapping**: Iron overload; Nitric oxide; DETC **167**, 199

**Sulfotransferase**: Cholestasis; Troglitazone; Bile acids; ABC transporter; Hepatotoxicity; Drug-drug interactions **167**, 83

**Systemic exposure**: Protein allergenicity; IgE; IgG; Oral exposure; Predictive testing **167**, 217

**Taurine**; Cadmium; Toxicity; Hepatotoxicity; Nephrotoxicity **167**, 173

**Teratogenicity**; di-*n*-butyltin; Developmental toxicity; Maternal age; Organotin **167**, 181

**TMTD**; Contact allergens; DEA; Dose–response; Guinea pig maximization test; Local lymph node assay; Sensitizing potency; ZDMC **167**, 207

**Toxicity**; Cadmium; Taurine; Hepatotoxicity; Nephrotoxicity **167**, 173

**Triton X-100**; Rat hepatocyte culture; Rhodamine 123; P-glycoprotein; Verapamil; Cyclosporin A **167**, 47

**Troglitazone**; Cholestasis; Bile acids; ABC transporter; Hepatotoxicity; Sulfotransferase; Drug-drug interactions **167**, 83

**Verapamil**; Rat hepatocyte culture; Rhodamine 123; P-glycoprotein; Cyclosporin A; Triton X-100 **167**, 47

**Xenobiotic**; Bile salt export pump; Hepatocytes; Hormone; Multidrug resistance-associated protein 2; P-glycoprotein **167**, 37

**Xenobiotic transport**; Multidrug resistance protein; ATP-binding cassette transporter; Xenotoxin elimination; Carcinogen metabolism **167**, 3

**Xenotoxin elimination**; Multidrug resistance protein; ATP-binding cassette transporter; Xenobiotic transport; Carcinogen metabolism **167**, 3

**ZDMC**; Contact allergens; DEA; Dose–response; Guinea pig maximization test; Local lymph node assay; Sensitizing potency; TMTD **167**, 207

**Zinc deficiency**; Growing rats; Hematological parameters; Mineral concentrations **167**, 163
